	Outstanding	excellent	Very good	Good	sufficient	unsatisfactory	unacceptable
Scientific curiosity.							
Specific knowledge in animal health and care							
Capacity to integrate new concepts							
Capacity for analysis and scientific reasoning							
Practical application of his/her knowledge							

Comments - strong and weak areas, progress achieved, suggestions for the academic curriculum, etc...

4. **Would you hire this student if you needed a technician ?** Yes No
Please briefly explain your answer.

Practical internships are an essential ingredient of the animal health technology program. After completing this evaluation, please discuss the results with the student trainee. This will greatly help him/her in his/her future career.

Please give this evaluation to the student who will then return it to us along with his/her final report. Thank you so much for your invaluable participation in our animal health technology program.
